While making an ascension Saturday during the Street Fair at Carlisle, Jack Cassell, the noted aeronaut, came near losing his life.

TORN TO PIECES.
A Bracken County Farmer Uses Through a Threshing Machine.

A frightful accident occurred at Chatham, Bracken county.

While John Case, a farmer of the neighborhood, was feeding wheat into a threshing machine, he was caught in the separator and dragged into the machine.

Before the machine could be stopped his body was torn into hundreds of pieces and carried through the machine.

The flesh and bones, after being carried through the threshing machine, came out with the straw and grain.

Death was instantaneous, as they could not reach the dissection portion of the case. There is only one way to cure death, and that is by constitutional remedies. Death is caused by an inflamed condition of the mucous lining of the stomach and bowels. When this tube is inflamed you have a running sore and imperfect healing, and when it is entirely closed death is the result, and unless the inflammation can be taken out and the tube restored to its normal condition, healing will be impossible; nine cases out of ten are caused by overeating, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Death (caused by overeating) that cannot be cured by Hall's Catarrh Cure. Send for free literature.

THE FIRE FIEND!
Ohio Valley Pulley Works Totally Destroyed Saturday Evening.

A prominent and valuable Maysville industry was hit by a hard blow Saturday night.

About 7:30 the smoke out in the brick boiler-room of the Ohio Valley Pulley Works on Forest avenue, soon extended to the main building and drying kiln, and in less than an hour the big concern was a complete ruin.

Just how the fire started is not known, but it is supposed to have originated in some slavings near the door leading from the boiler-room to the main building.

Only a few moments before Mr. Henry Glenn, the Night Watchman, had left the boiler-room, going to the second story of the big building to register his usual round on the indicator, and when he left the boiler-room everything was in a good shape.

It was one of the hottest fires ever experienced in this city, everything being of a combustible nature, and many barrels of oil and paint adding intensity to the flames and heat.

This rendered the work of the brave firemen most difficult, several having their faces blistered by the heat, and coupled with the fact that there were no water pipes near by, it is marvelous that all surrounding property did not share the fate of the Pulley Works.

As it was, a small structure across an alley, used by the colored folks as a bath room, was wiped out.

The residence of Henry Bailey, colored, was damaged to the extent of some \$200, the contents being saved. The house is insured for \$300 for the benefit of the People's Building Association, and the Association will probably apply the money in repairing it and restoring it to Mr. Bailey.

The residence of Henry Stevens was also slightly scorched.

Piled on grounds adjacent to the Works and in the drying kiln were some half million feet of lumber, the greater part of it seasoned poplar and hard-wood, and of this fully \$50,000 worth were totally destroyed.

The loss to the owners of the Pulley Works is placed at \$50,000, with an insurance of \$15,000 in these local Agencies:

Boulder & Parker..... \$4,000
J. J. Fleming..... 4,000
Everett & Cheshworth..... 3,000
Russell Warder..... 1,000
O. M. Murray..... 1,000
W. F. O'Donnell..... 1,000
Total..... \$14,000

The Company owning the Works is composed of Messrs. Thomas A. Keith, President; James W. Fitzgerald, Vice-President; M. P. Inwouing, Secretary and Treasurer; D. A. Sprinkle, Superintendent; W. W. Hall and Joseph D. Feed.

The calamity falls with especial severity upon Mr. Browning, who has lost everything save that precious gem, a good cause.

The company had just emerged victorious from an expensive suit brought by a rival concern which sought to crush it out; and only a few days since had finished payment of over \$200 in lawyer's fees.

Only last week there had been shipped two parcels of pulleys, there was in the building at the time of the fire about \$50,000 worth of finished and unfinished work, and orders were on file to keep the plant busy for the next three months—showing a bright future in store.

The concern employed 75 hands, with a weekly payroll of nearly \$800, and the enforced idleness of these operatives will be a serious blow to the whole city—more especially to the Eastern section.

THE LEADER learns that the Pulley Company will probably rebuild, and if it does that the new structure will be located nearer the railroad and will be larger and better than the one destroyed.

In order to accelerate the rebuilding of this valuable plant, the Board of Trade, at the suggestion of a number of liberal and influential citizens, will meet in the One Building this evening at 7:30 in mass session in the premises.

NEWS IN KENTUCKY.

THE GOVERNOR HOAXED.

Bradley's Hasty Call for Troops—Two
Forged Messages—The Governor
is Very Indignant.

LINCOLN, Ky., July 3.—Gov. Bradley arrived here Sunday from Cincinnati with the information that the call for 300 state troops Saturday night was the result of forged messages to him purporting to be from a gentleman in Lexington in whom the governor had confidence and a message from Frankfort purporting to be from a state officer. He was informed by these messages that there was much trouble in Clay county; that the Howards were sure and were at the mercy of the Philopots and Bakers and that unless troops were sent at once many lives would be sacrificed.

The governor immediately issued the order for the troops to go to Clay county Sunday morning. Later he became suspicious, and after a telephone consultation with Adj. Gen. Collier and Col. Williams the order was revoked. The governor says he will do all he can to fix the responsibility for the fake.
